WORK EXPERIENCE

Looping.tech
Front End Developer • Aug 2019 — Dec 2021

- WordPress theme development using Sage. Webpack-based setup, stylesheets written with Sass, used Laravel's Blade templating engine;
- Developed websites with Next.js and WordPress Headless CMS;
- Developed websites with React.js and Node.js using TypeScript; and
- Hosted and configured on AWS.

Simple [A]
Software Developer Intern • Jan, 2019 — Jun 2019

- A web crawler using DotnetSpider;
- Bag-of-Words model to derive recommendations from the articles;
- Neo4j graph database to save the results with relationships between articles, title, keywords and paragraphs; and
- GraphQL API so the chatbot agent can provide the module with words from the current conversation context. The module checks word frequency in articles and how many relationships exist between the words. It returns 1-3 URLs for the articles with the highest recommendation scores.

Body Bazar
Shopify Web Developer • Aug 2017 — Jun 2018

- Developed a Shopify theme like the current website design using Liquid, Sass and JavaScript;
- Migrated the website from Magento to Shopify;
- Integrated solutions for payment gateway, shipping and other apps;
- Prepared the internationalisation of the shop;
- Developed a customer loyalty and rewards programme; and
- Assisted the owner to learn how to use the platform and work on the website further.

Mjukhud.se
Junior Web Developer • Jan 2013 — Dec 2016

- Worked on responsive design for classic WordPress and Magento themes using HTML5, CSS3 (and Bootstrap), JavaScript (with JQuery) and PHP;
- Assisted the lead developer with (manual) testing;
- Managed and implemented WordPress updates and Magento patches; and
- Used user feedback and site performance statistics to identify and fix issues.
